

Micro Screw System & Micro Screw System Basic

„Olsberger Konzept“ by Prof. Dr. Fouad Khoury

The Bone Management® Micro Screw Systems are used for the safe fixation and stabilisation of cortical bone grafts. The special feature of these systems are the osteosynthesis screws, which have a diameter of 1.0 mm and 1.2 mm. These Micro Screws are made of surgical stainless steel, which gives them high stability despite their reduced diameter.

BMSBA
Micro Screw System Basic

BMS00
Micro Screw System

At a glance

- Safe fixation and stabilization of cortical bone grafts
- Osteosynthesis screws with diameters of 1.0 and 1.2 mm

- Osteosynthesis screws made of surgical stainless steel for high stability
- Self-tapping thread flanks allow the osteosynthesis screws to be screwed in without creating a gliding hole
